

How to recruit students to take the Biotech class?

Thank you for helping Ms Getz figure this out.

Last year there were enough people signed up for the class that there could have been 2 sections. As you can see, we only have 15 students who made it into the class and are still accepting its challenges.

Can you help Ms Getz figure out how to market the class so that enrollment stays high enough for the class to stay a class at Gateway?

So you can get credit for taking the survey, please tell Ms Getz who you are. She will be reading through these surveys in the next few weeks so she can use your ideas. You will have to trust that she will not hold your opinions against you.
